CSC 111E: Lab #1   Prelab

This pre-lab will prepare your computer for the first lab in CSC 111E.

Please complete the following steps before arriving in lab on Thursday, 8/29:

1) Make sure you can logon to your Windows laptop (unfortunately, Macs won't work for what we need to do in lab)

2) Make sure you have 5 gigabytes of free space on your laptop hard drive. The "Visual Basic" software we are installing in lab takes approximately that much space.

3) Bring your Windows laptop to class and lab on Thursday.
